PROJECT PRESENTATION

Madrasa Management System (MMS)

A Modern Web-Based ERP for Islamic Educational Institutions

MMS

Presented by Md. Fahad Faisal (2023200000136)
Supervised by Mohammad Shohel Rana
Institution Southeast University
Date 1 October 2026

INTRODUCTION

What is MMS?

The Problem

- Madrasas still rely on paper-based records for students, attendance, and fees
- Data is scattered, hard to search, and impossible to audit
- Manual fee tracking leads to lost receipts, unrecorded payments, and disputes
- No visibility for principals to make data-driven decisions

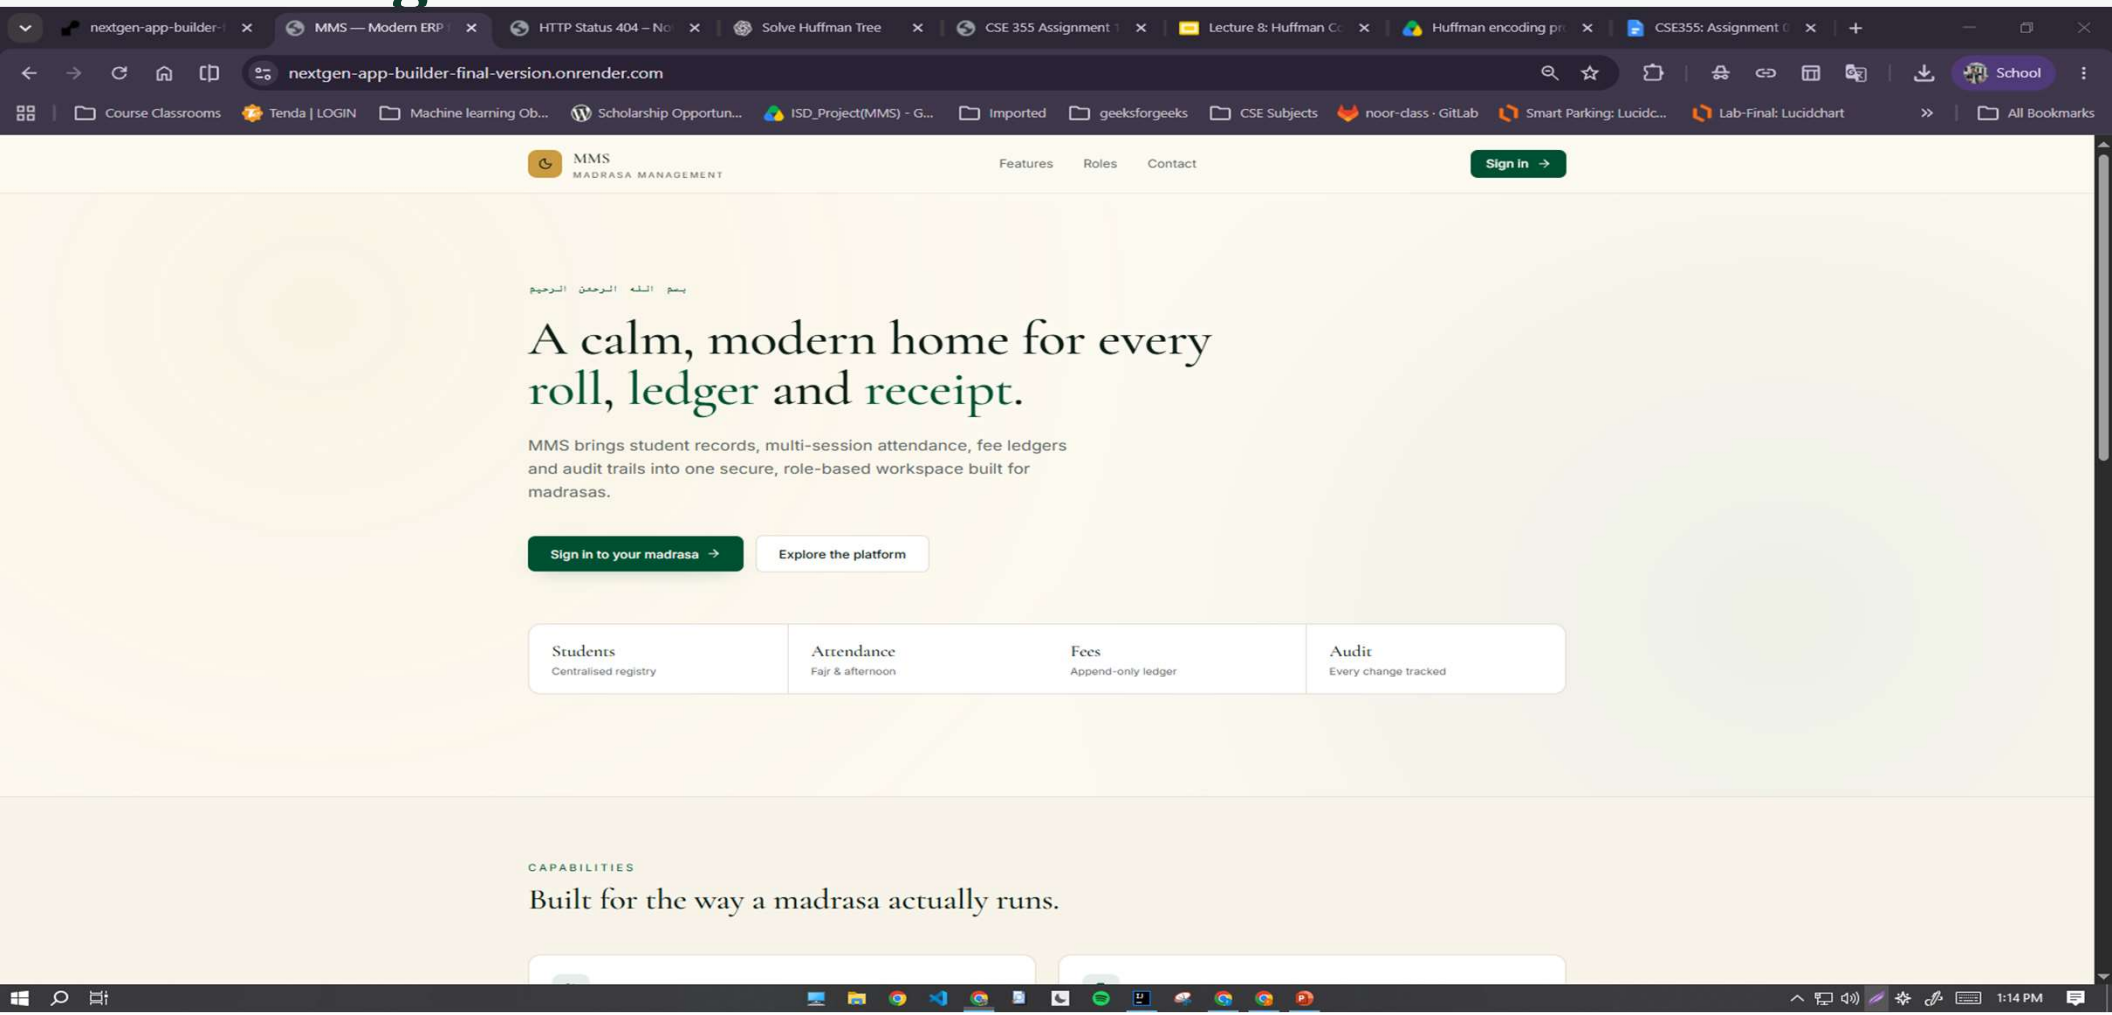

The Solution

MMS is a complete digital operations console that brings every aspect of madrasa management into one secure, role-based platform.

“A calm, modern home for every roll, ledger and receipt.”

GOALS

Project Objectives

By the end of this project, MMS provides:

1. **Centralized Student Registry**
   One searchable source of truth
2. **Multi-Session Attendance**
   Fajr & Afternoon tracking
3. **Append-Only Financial Ledger**
   Every transaction preserved forever
4. **Instant Receipt Issuance**
   Auto-numbered, printable receipts
5. **Defaulter Tracking**
   Who owes what, for how long
6. **Year-End Bulk Promotion**
   Move entire classes forward in one click
7. **Class Sections with Capacity**
   Split large classes into manageable sections
8. **Complete Audit Trail**
   Every action logged with actor + timestamp
9. **Role-Based Access Control**
   Each user sees only what they need
10. **Offline-Resilient Attendance**
    Works without internet, syncs later

KEY FEATURES

Student Management

Student Registry

- Full demographic profile: name, guardians, DOB, address
- Unique roll number enforcement (no duplicates)
- Search across name, roll number, guardian phone
- Filter by class, section, or status

Student Documents

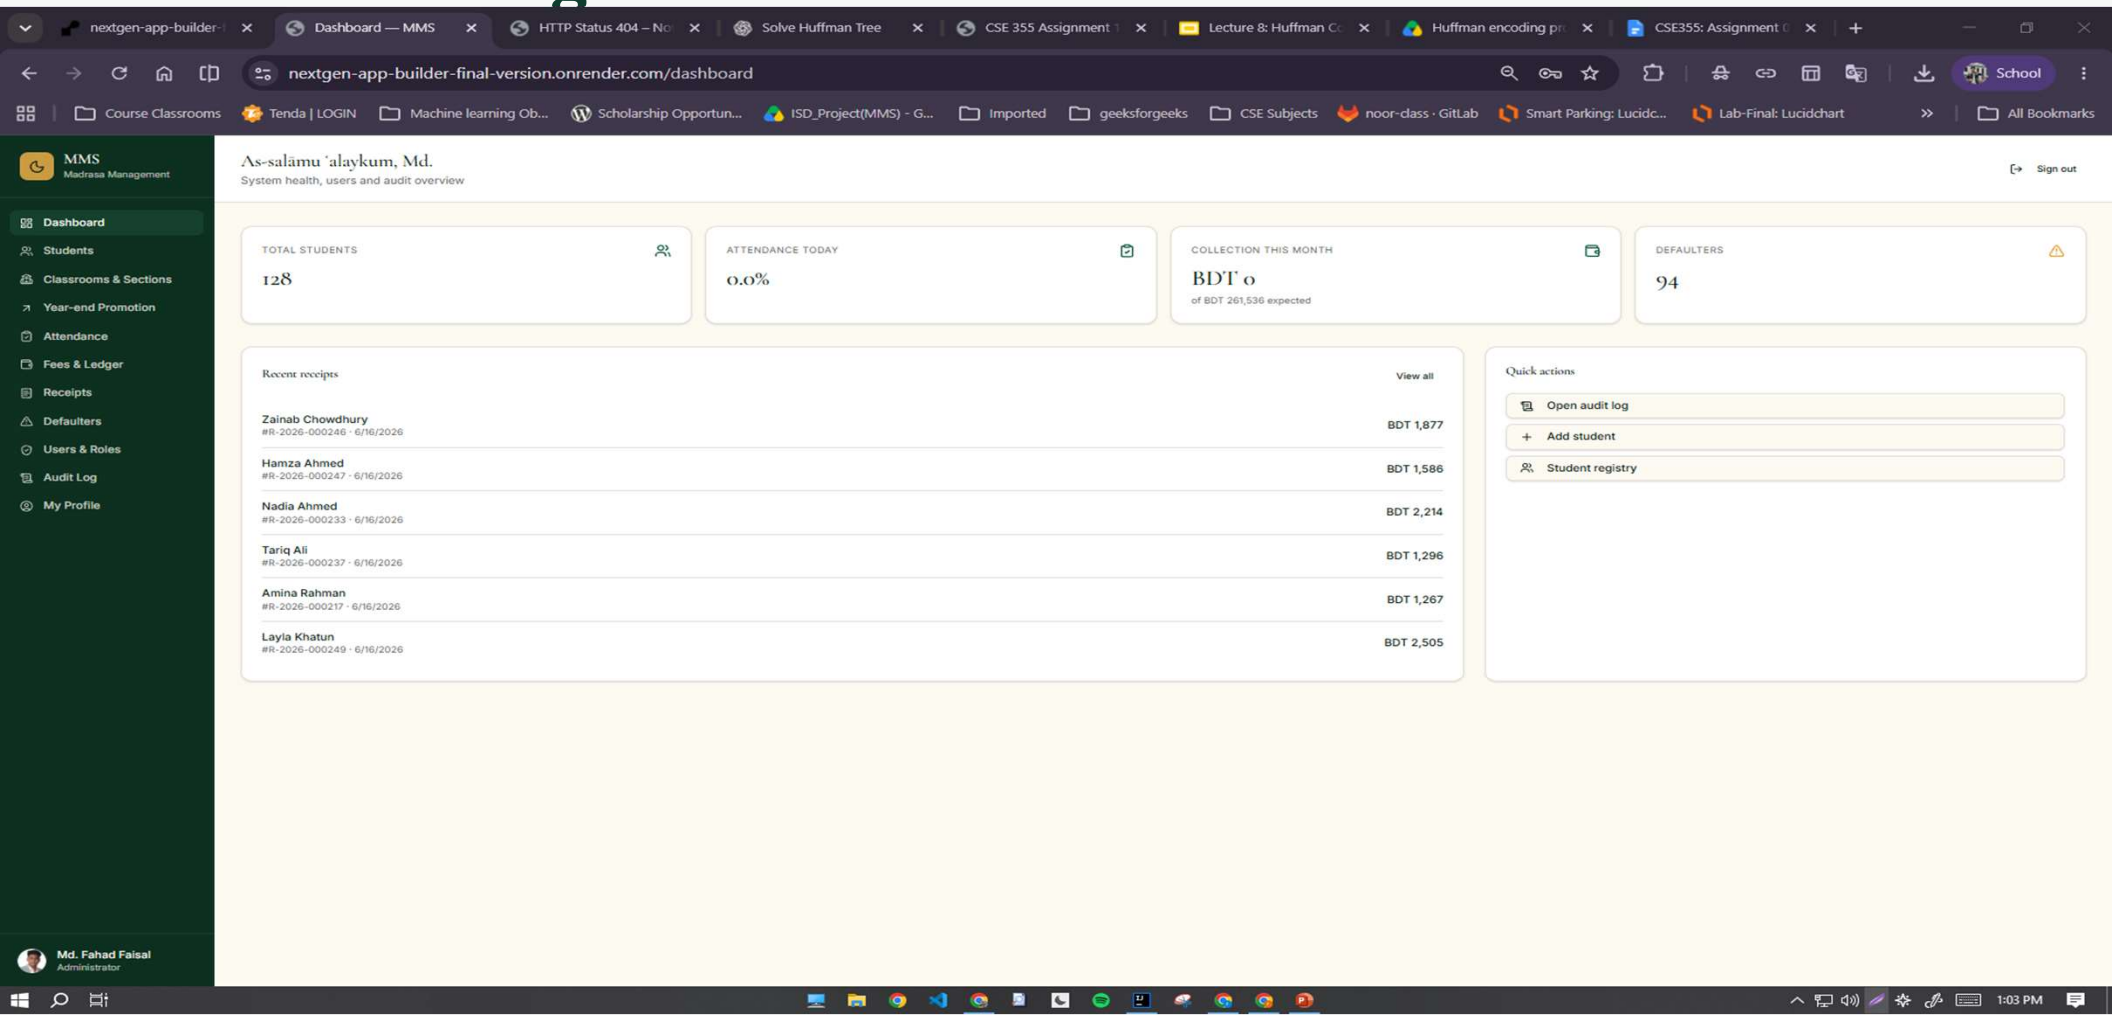

- Upload birth certificates, photos, transcripts
- Secure storage in Supabase Storage
- Preview images inline, download PDFs

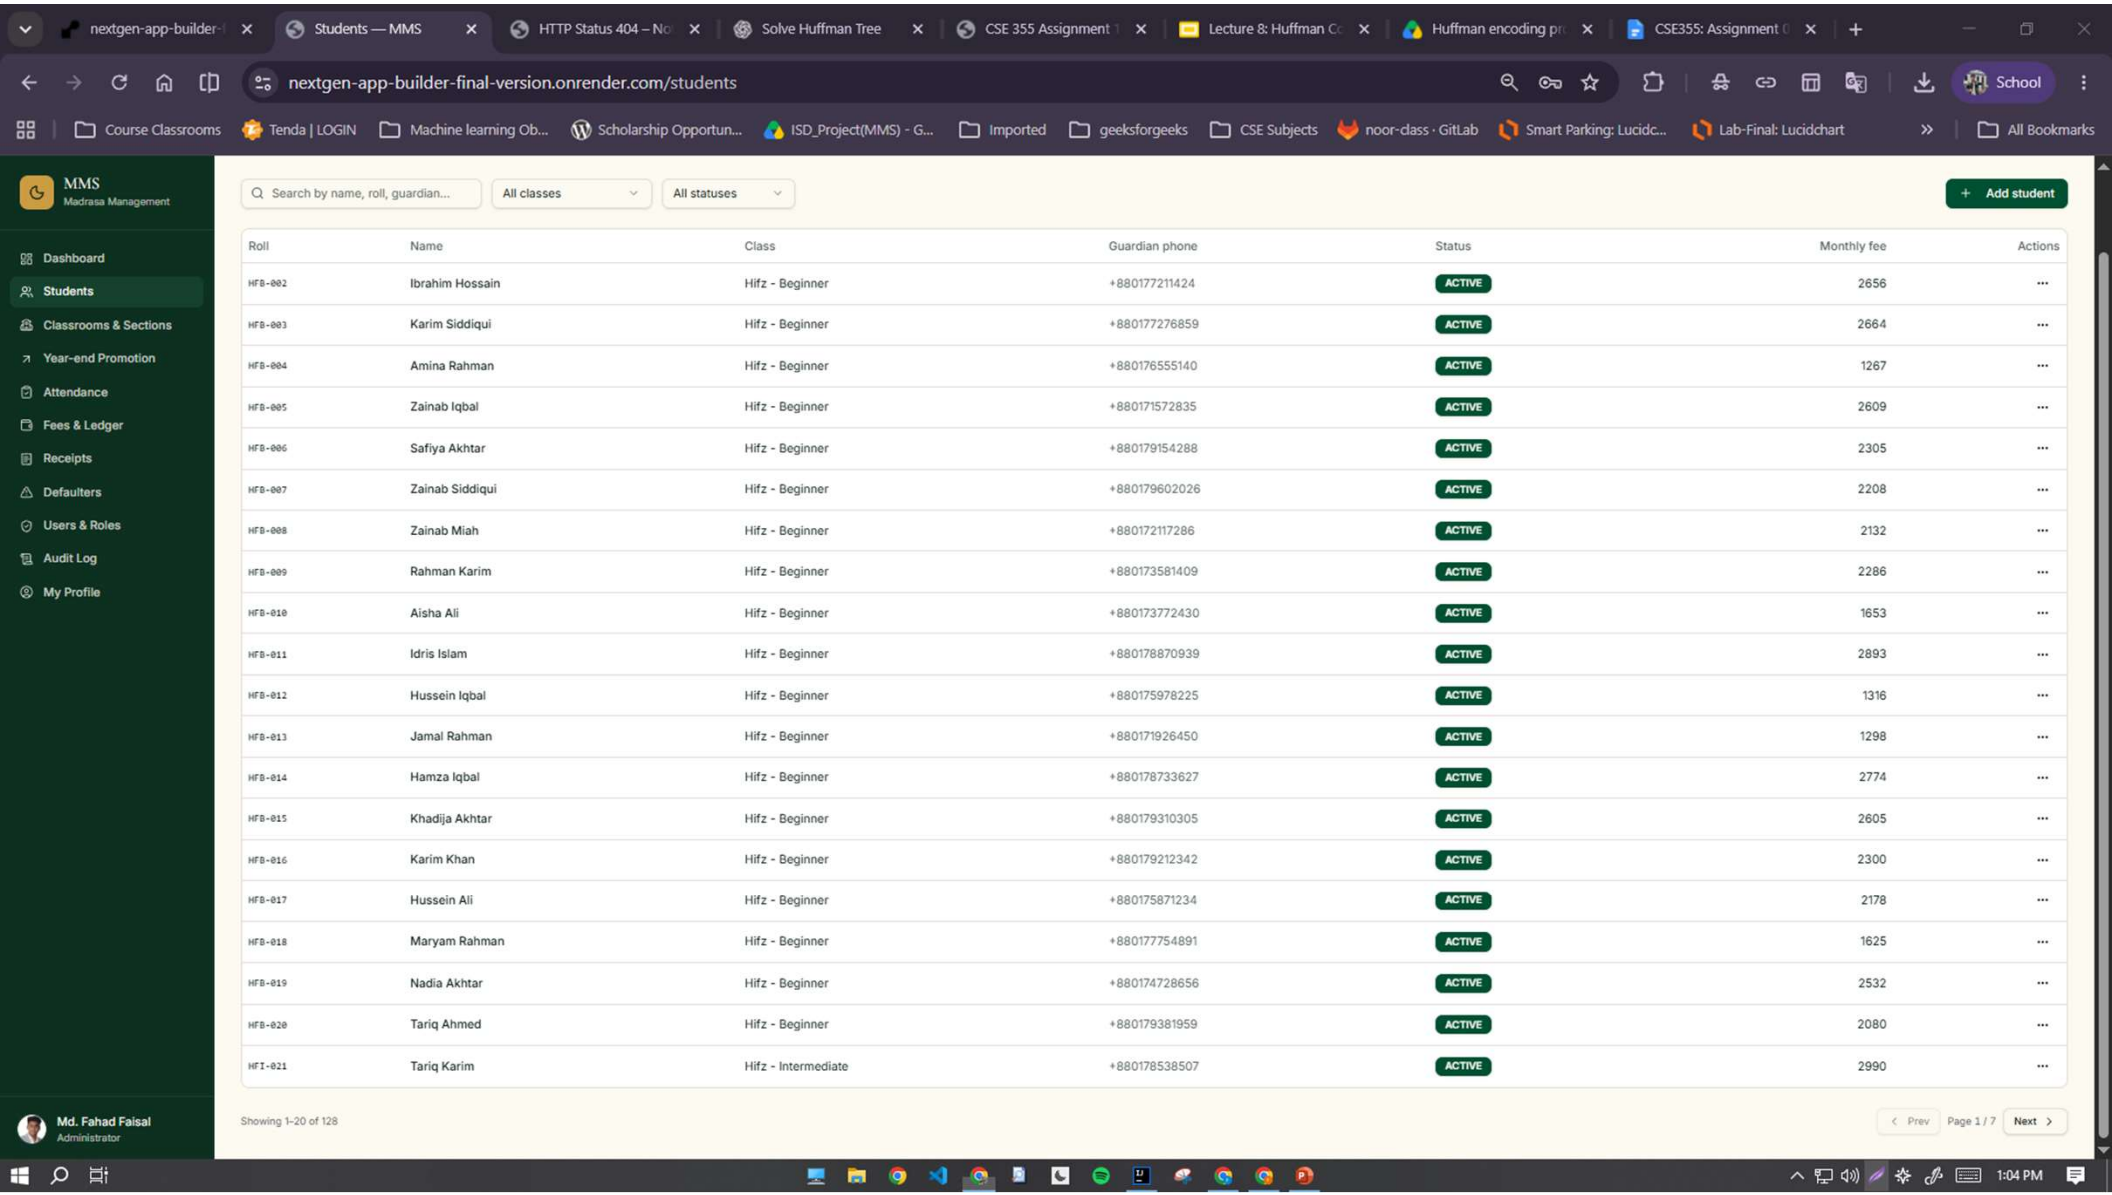

Student Lifecycle

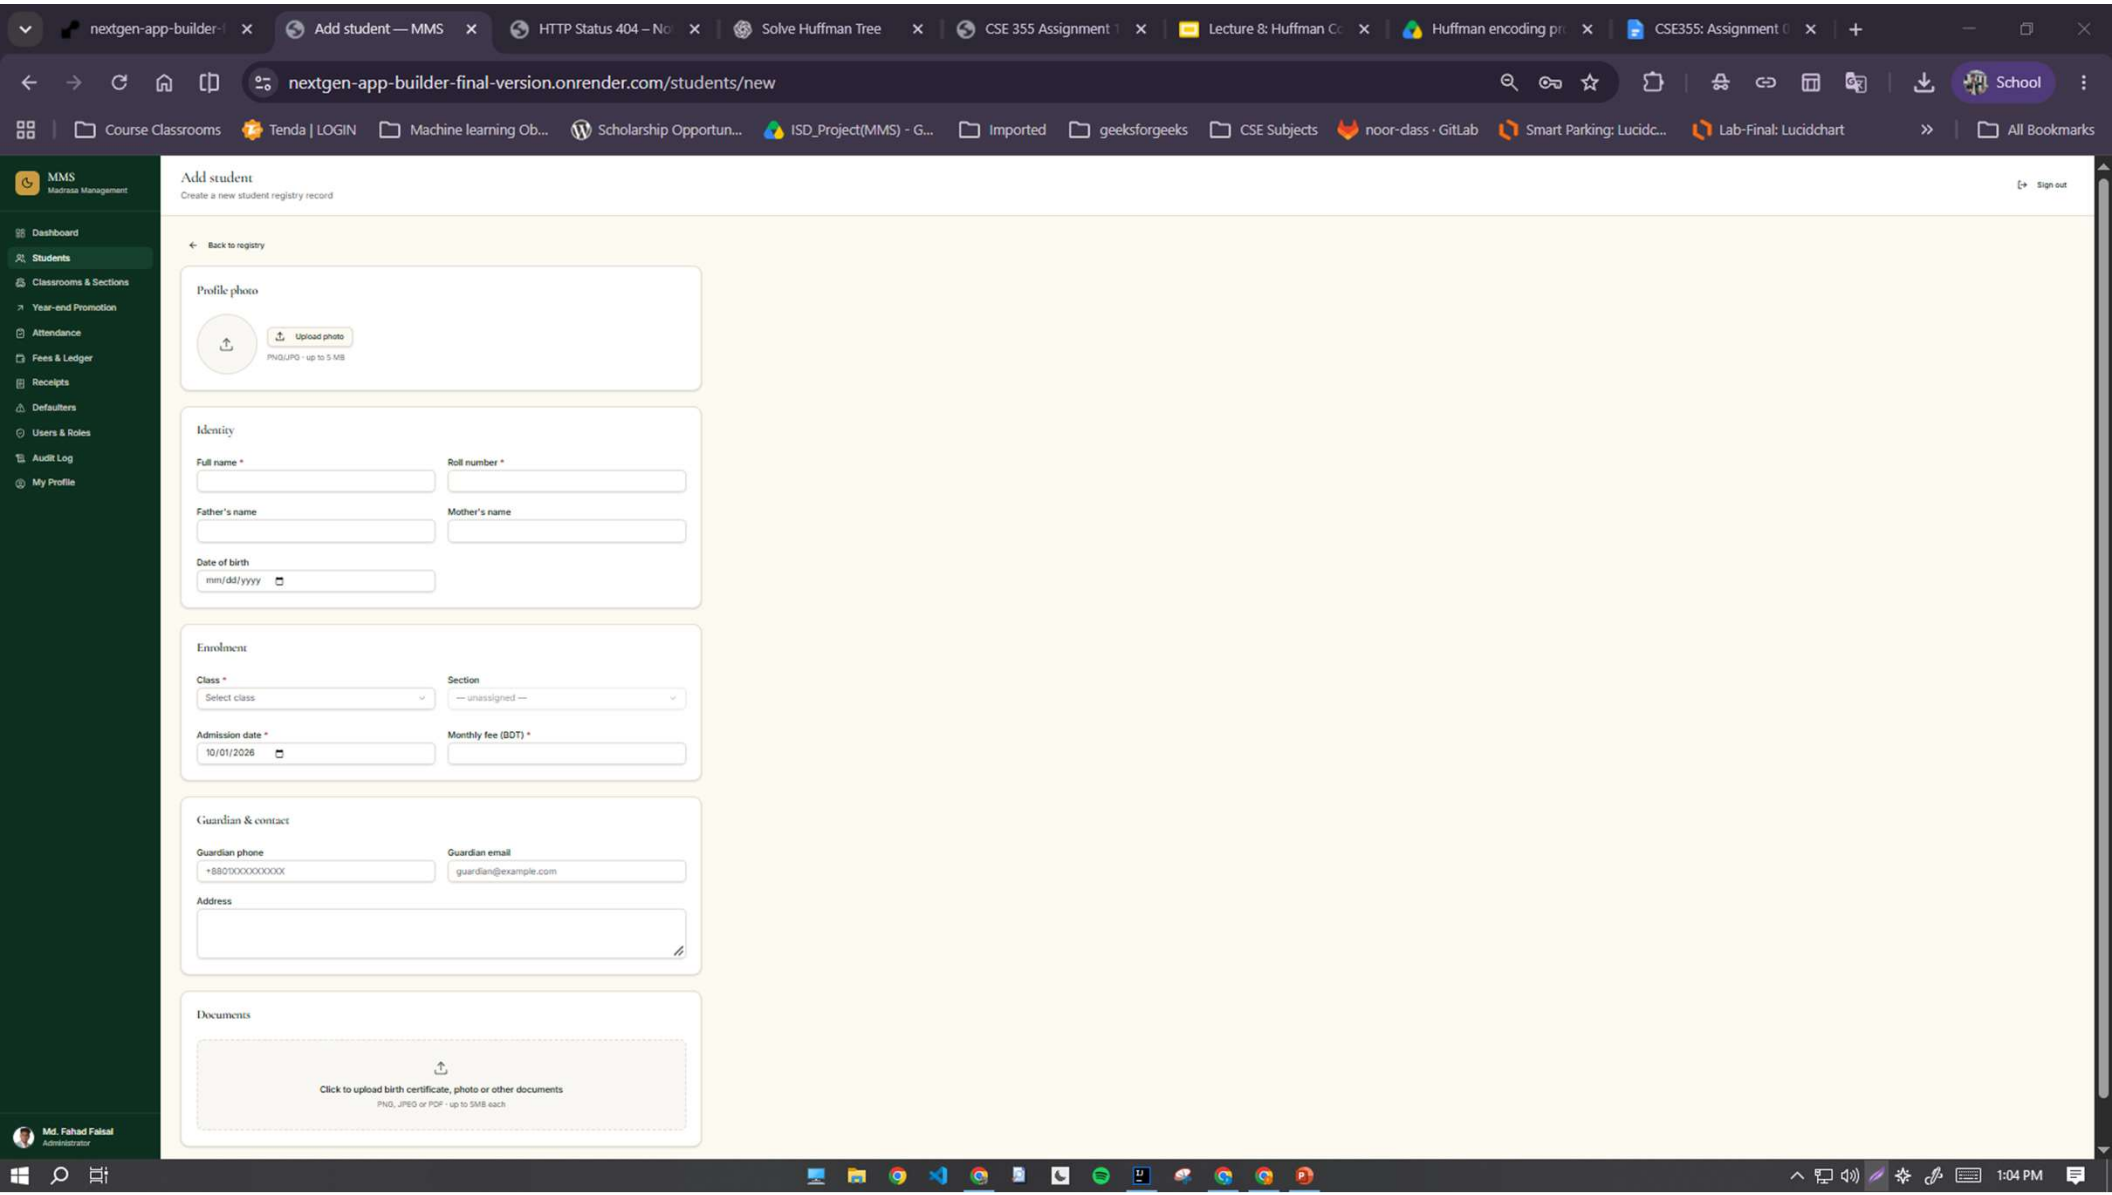

- Create → Edit → Archive → Reactivate
- Ledger history preserved even after archival

KEY FEATURES

Classrooms & Sections

The problem: *a class like "Nazira" may have 80+ students — too many for one room or one teacher.*

Our Solution: Sections

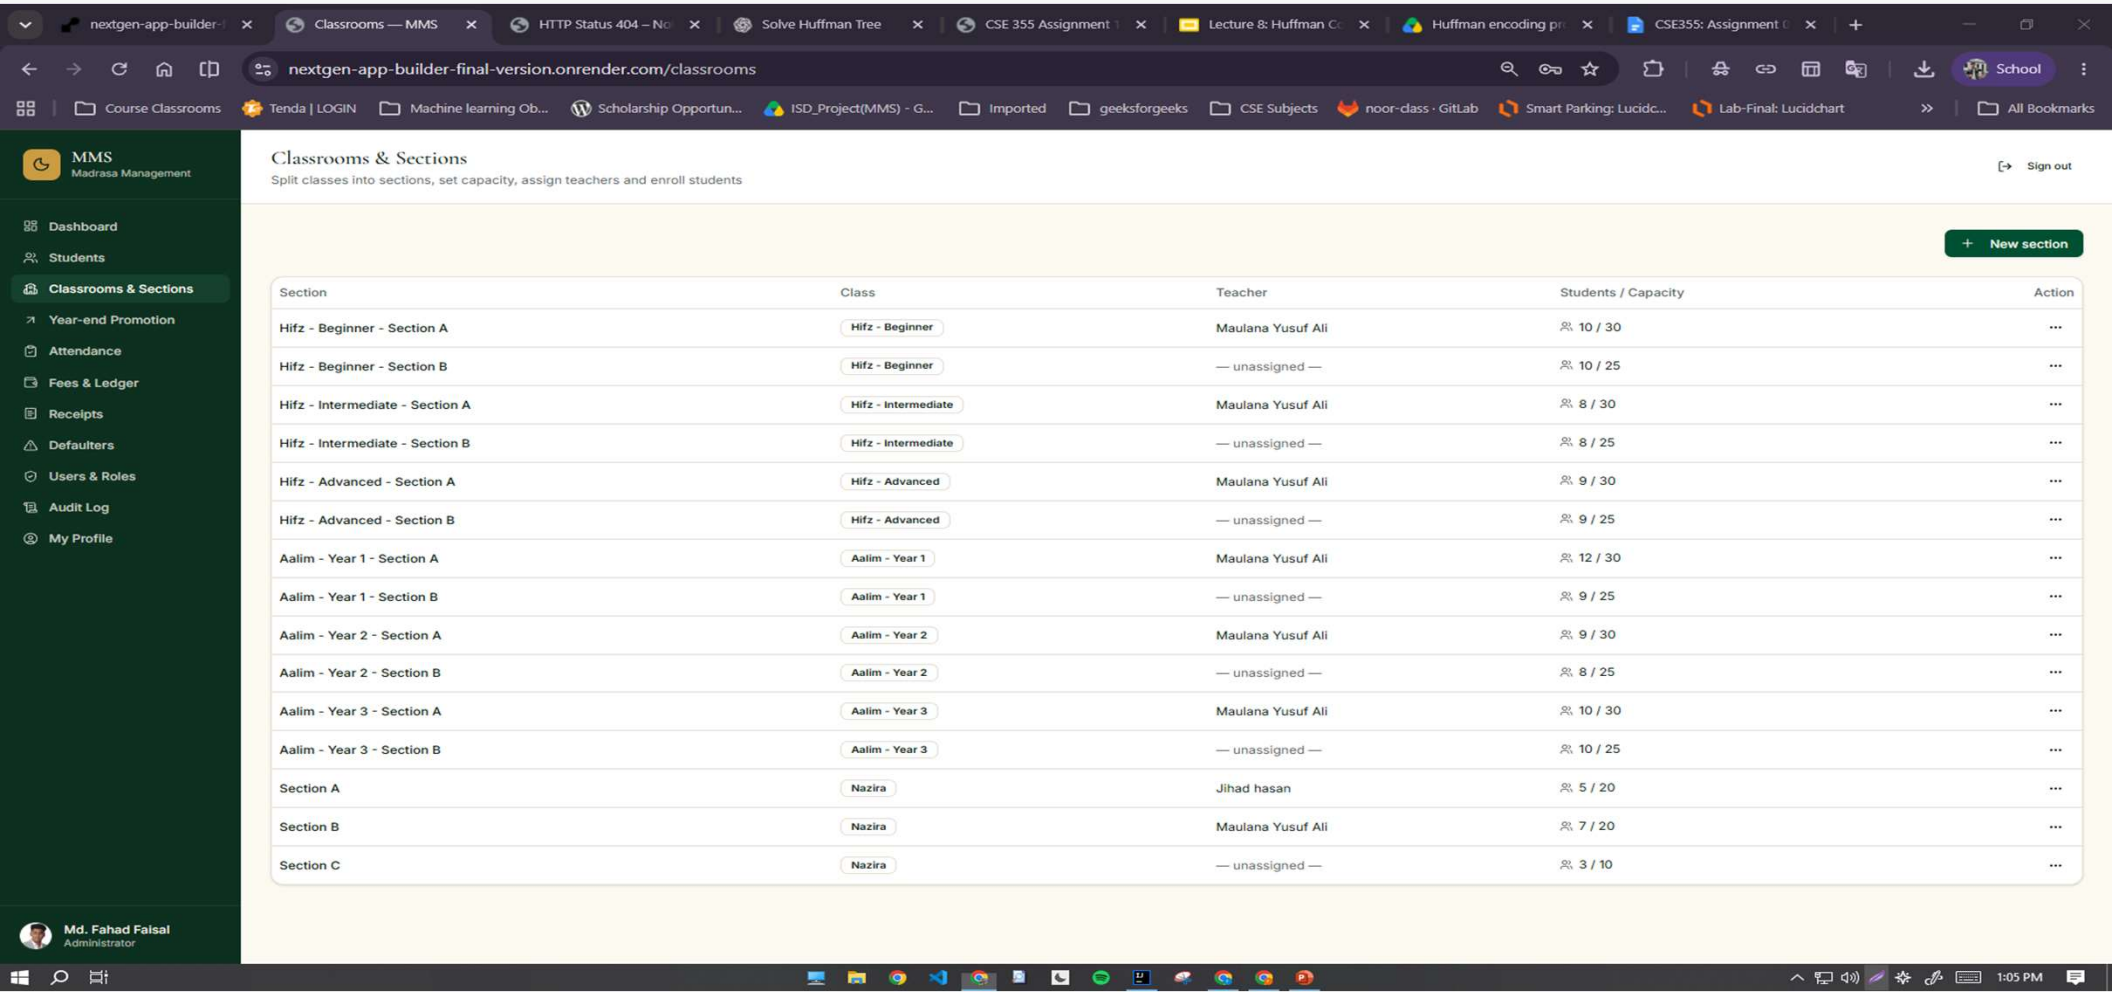

- Each class can have multiple sections (A, B, Morning, Evening)
- Each section has its own teacher and capacity
- Students are assigned to a specific section

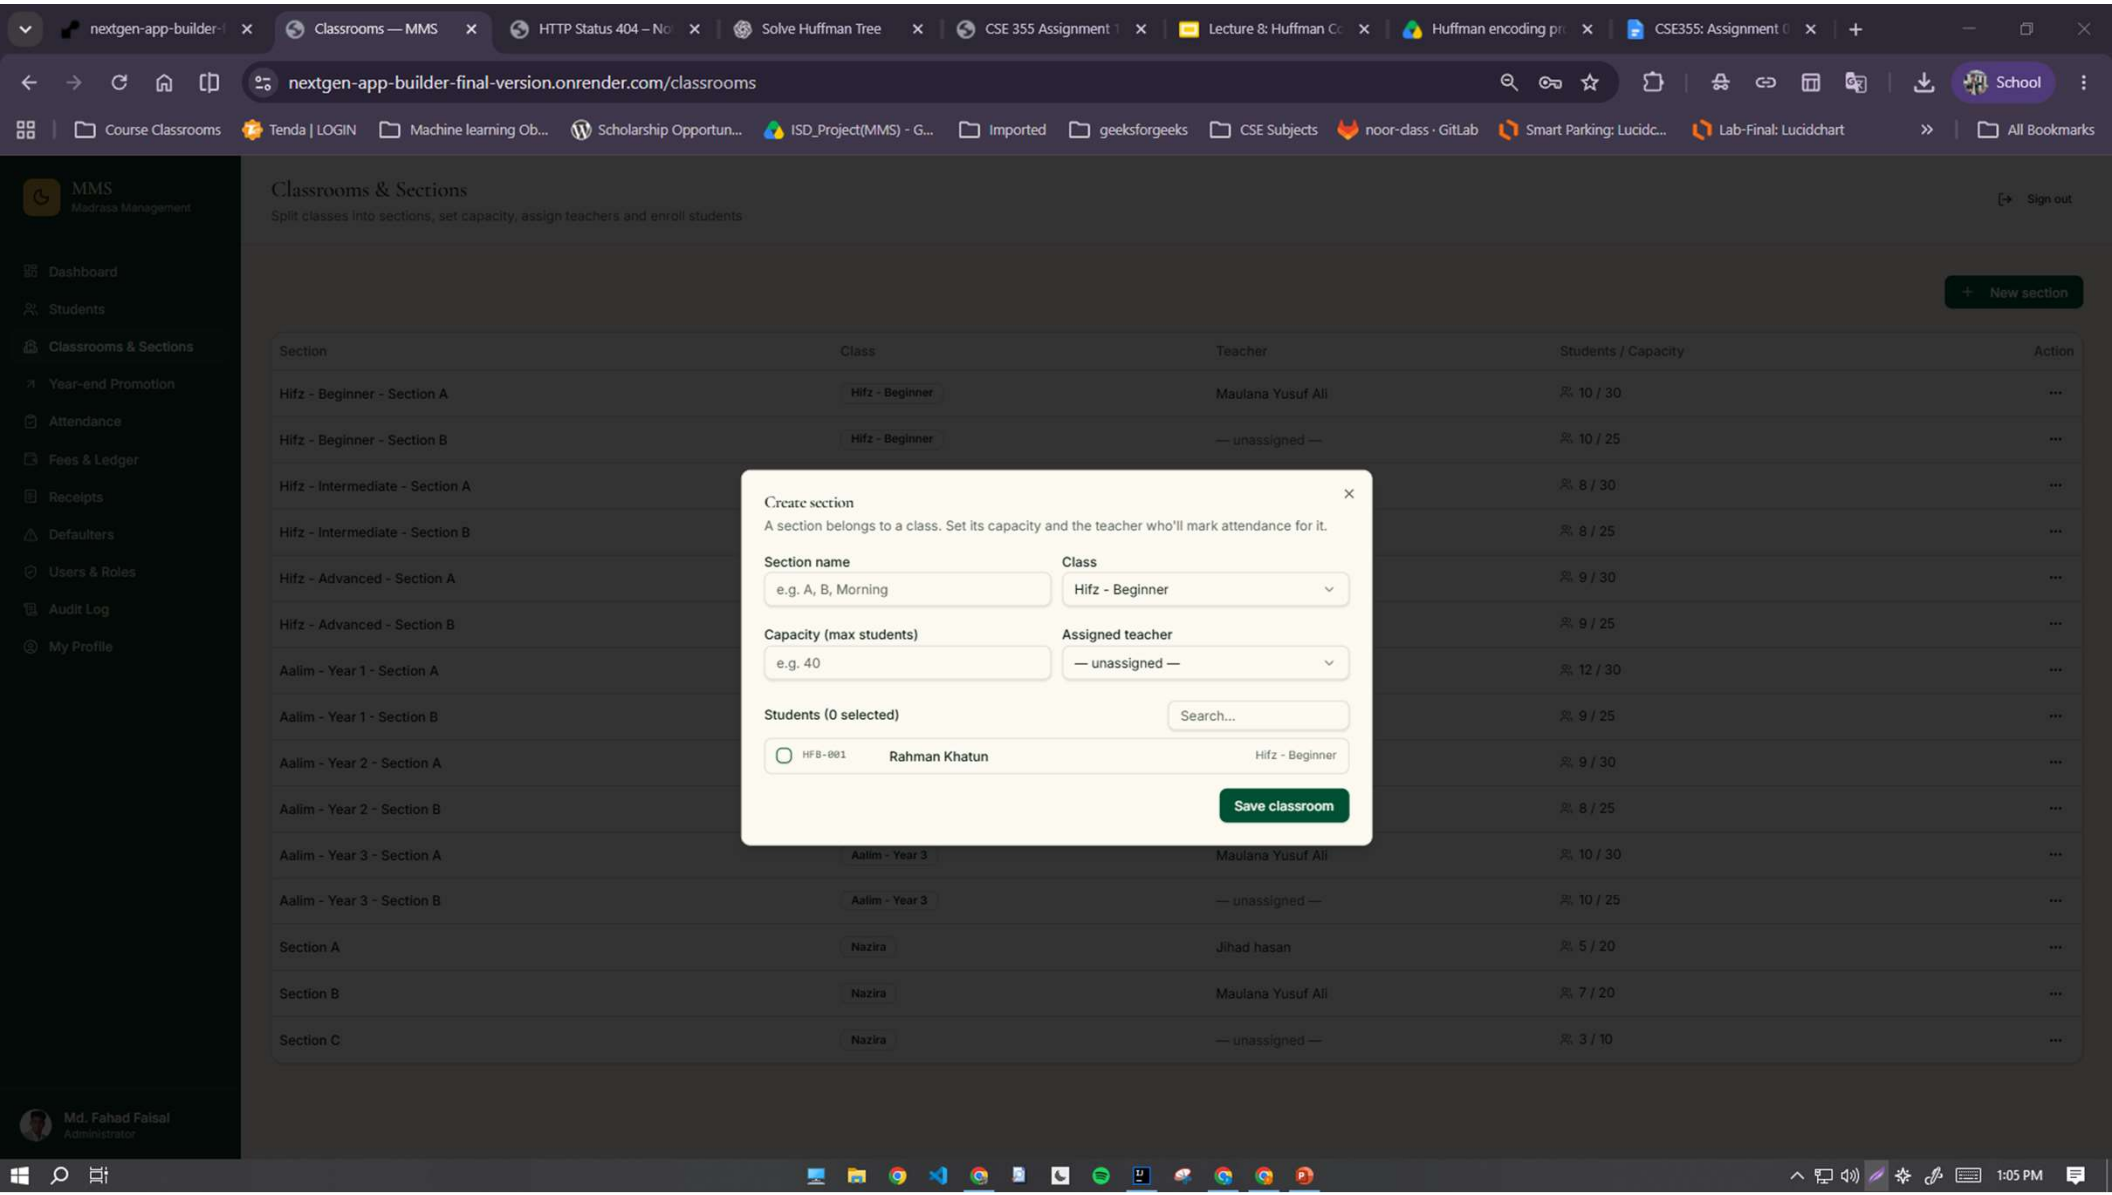

Capacity Enforcement

- Backend rejects enrollment if section is full
- Frontend disables full sections in dropdowns
- Live enrolled/capacity shown next to each section

LIVE DEMO

KEY FEATURES

Attendance System

PRESENT
Attended on time

ABSENT
Did not attend

LATE
Attended but delayed

SICK
Absent due to illness

Dual-Session Tracking

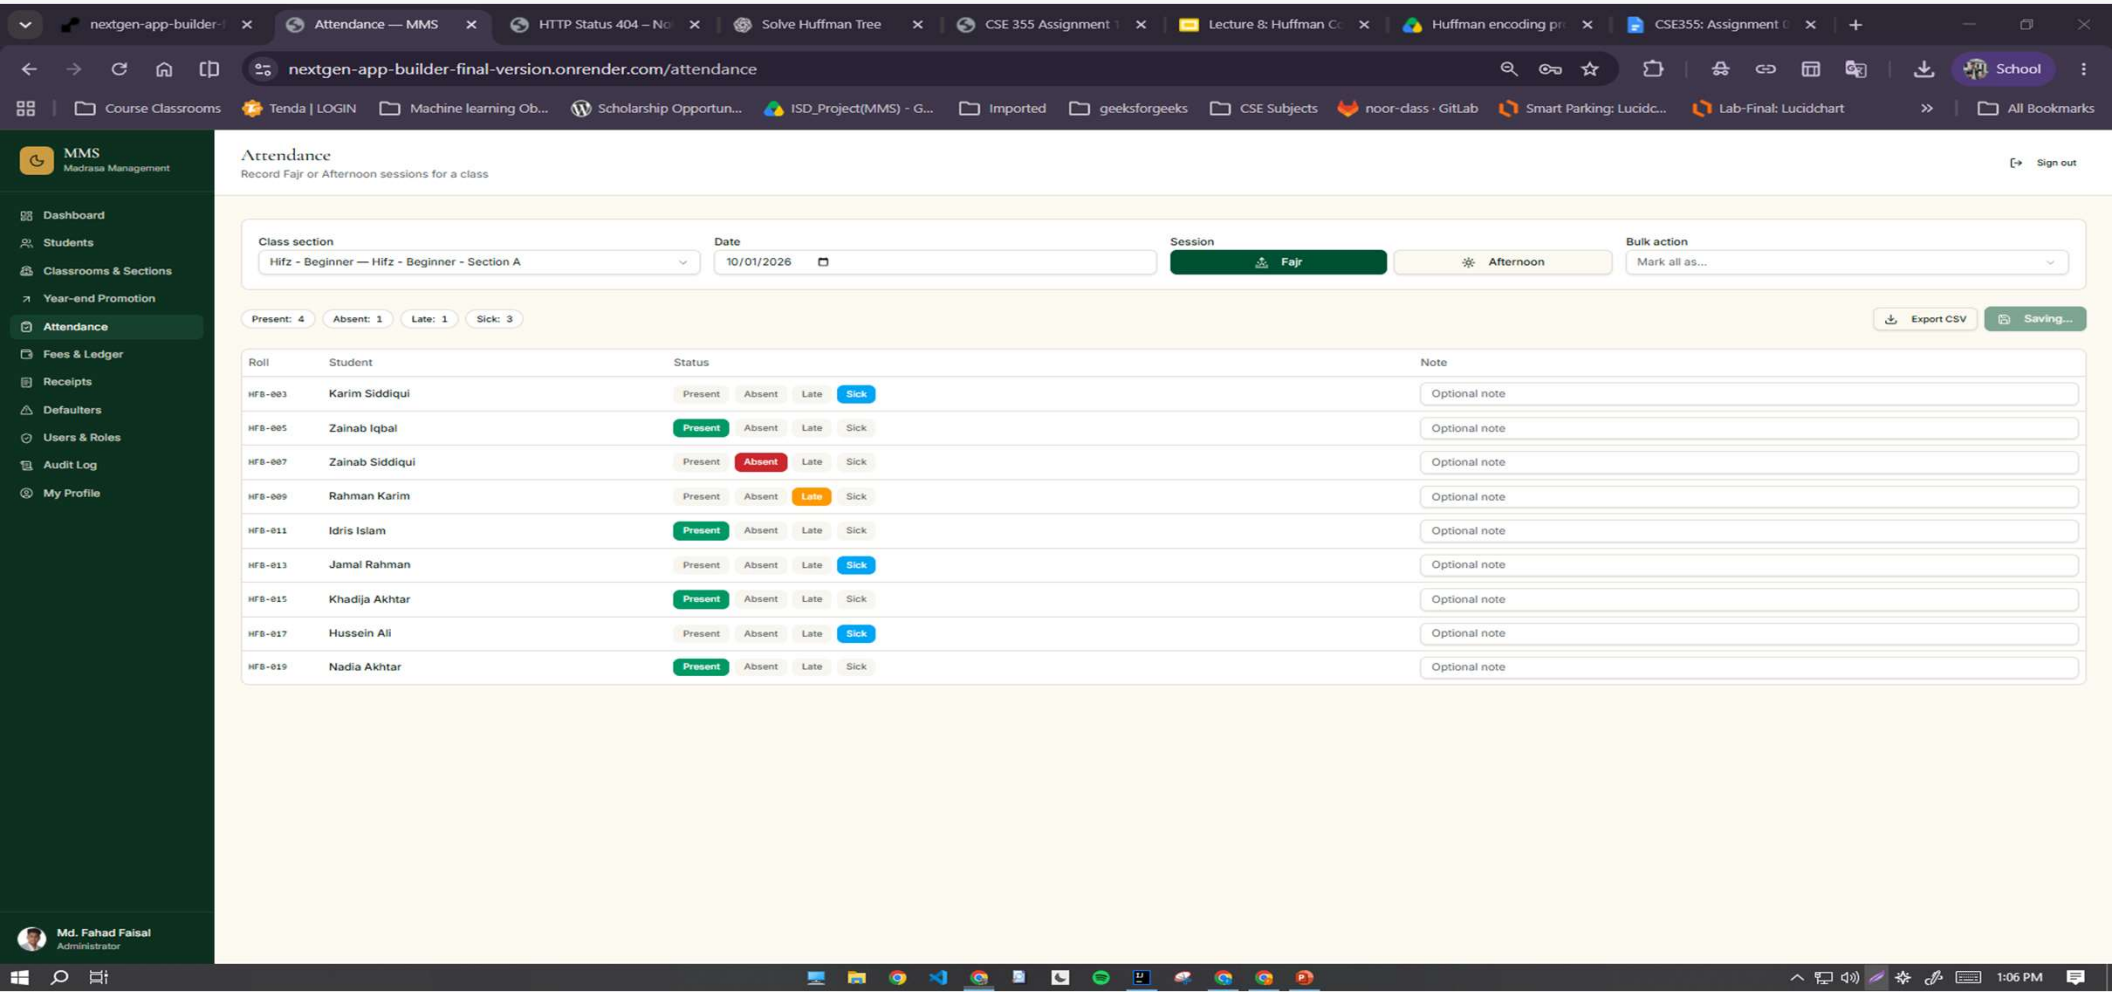

- **Fajr Session** — morning Quran recitation
- **Afternoon Session** — regular classes

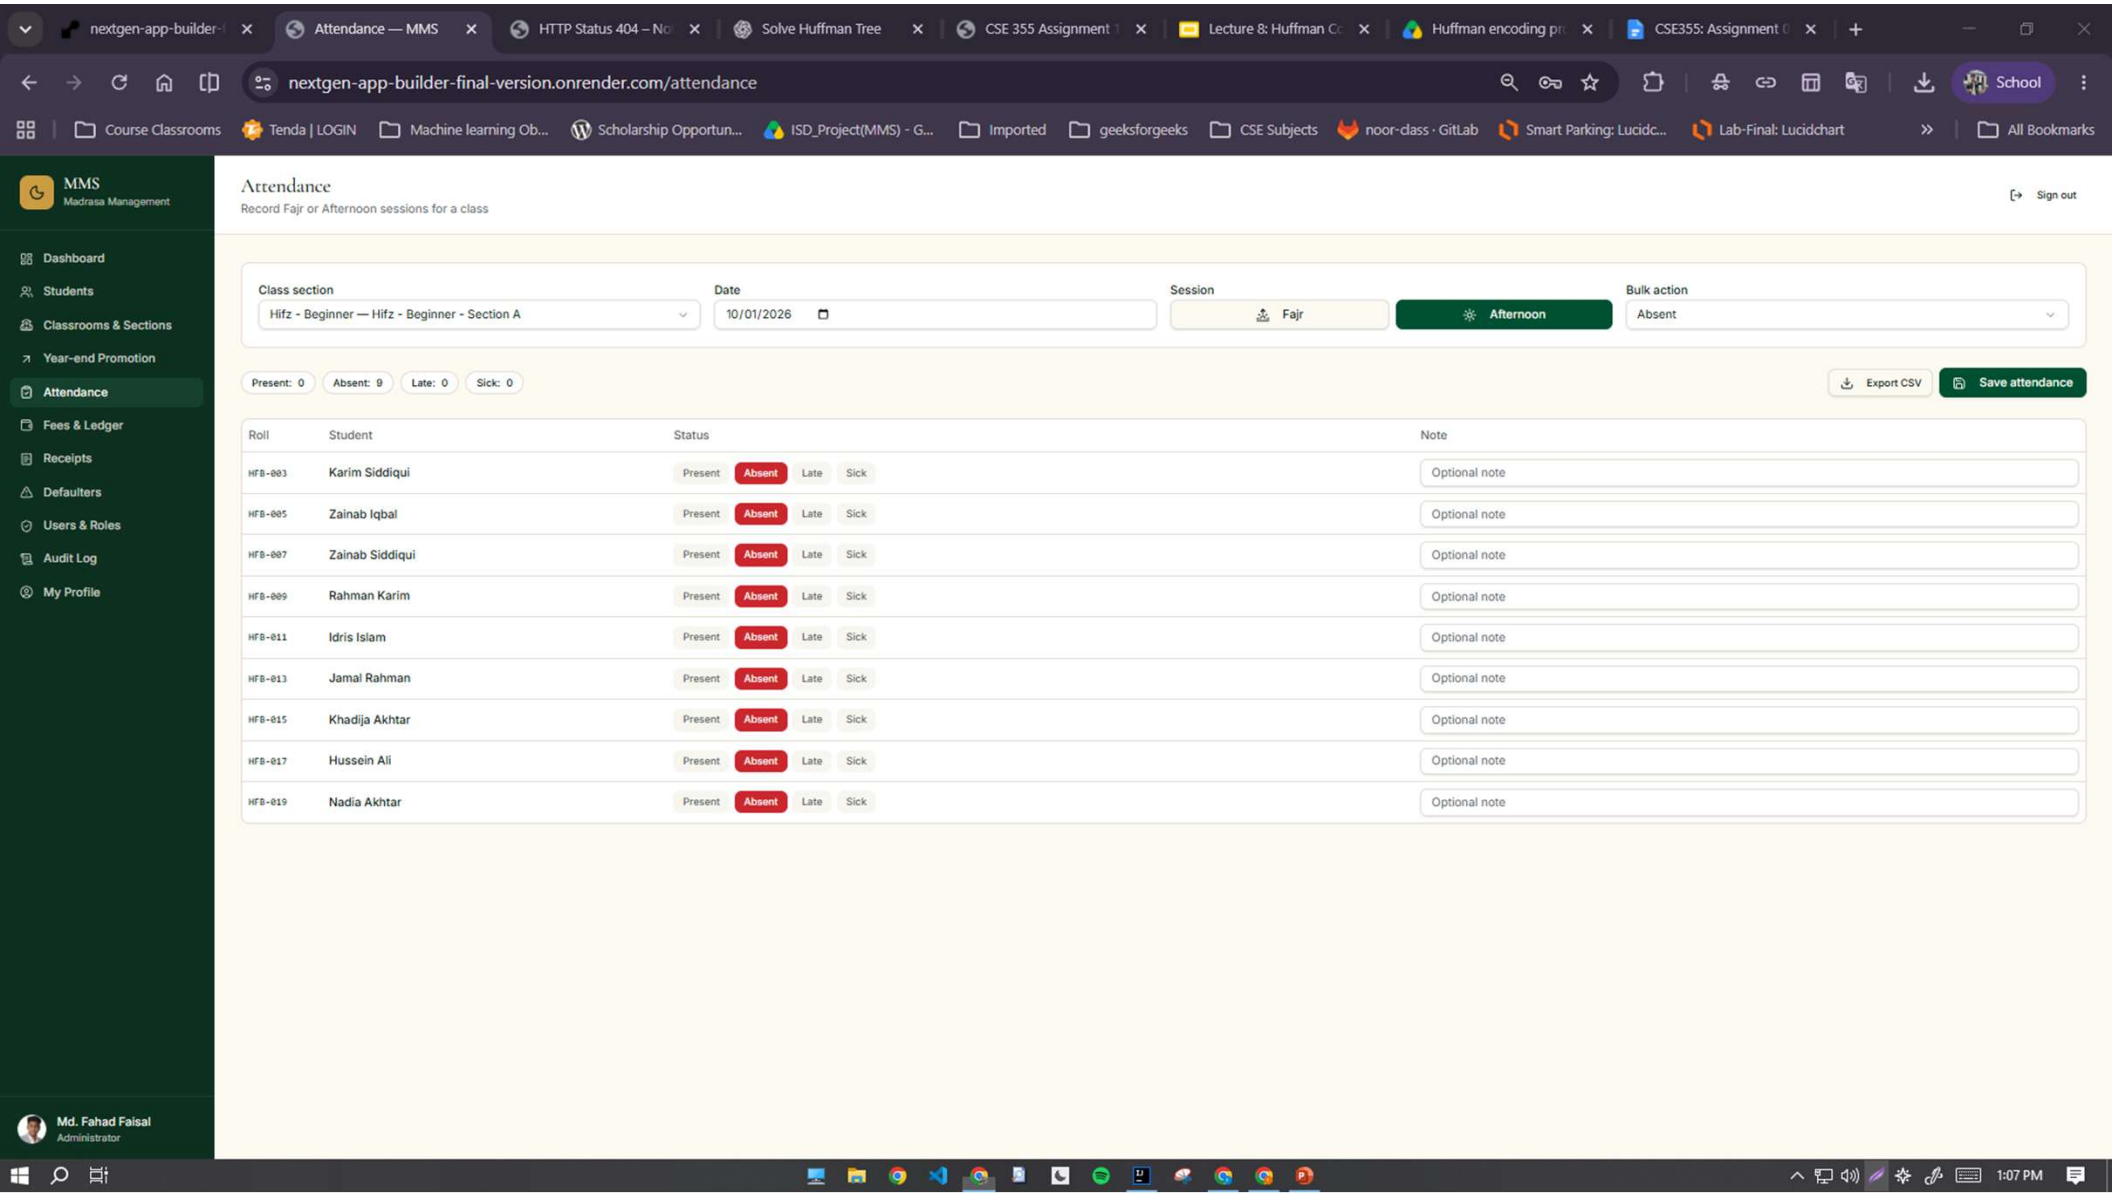

Instructor Scoping & Offline Support

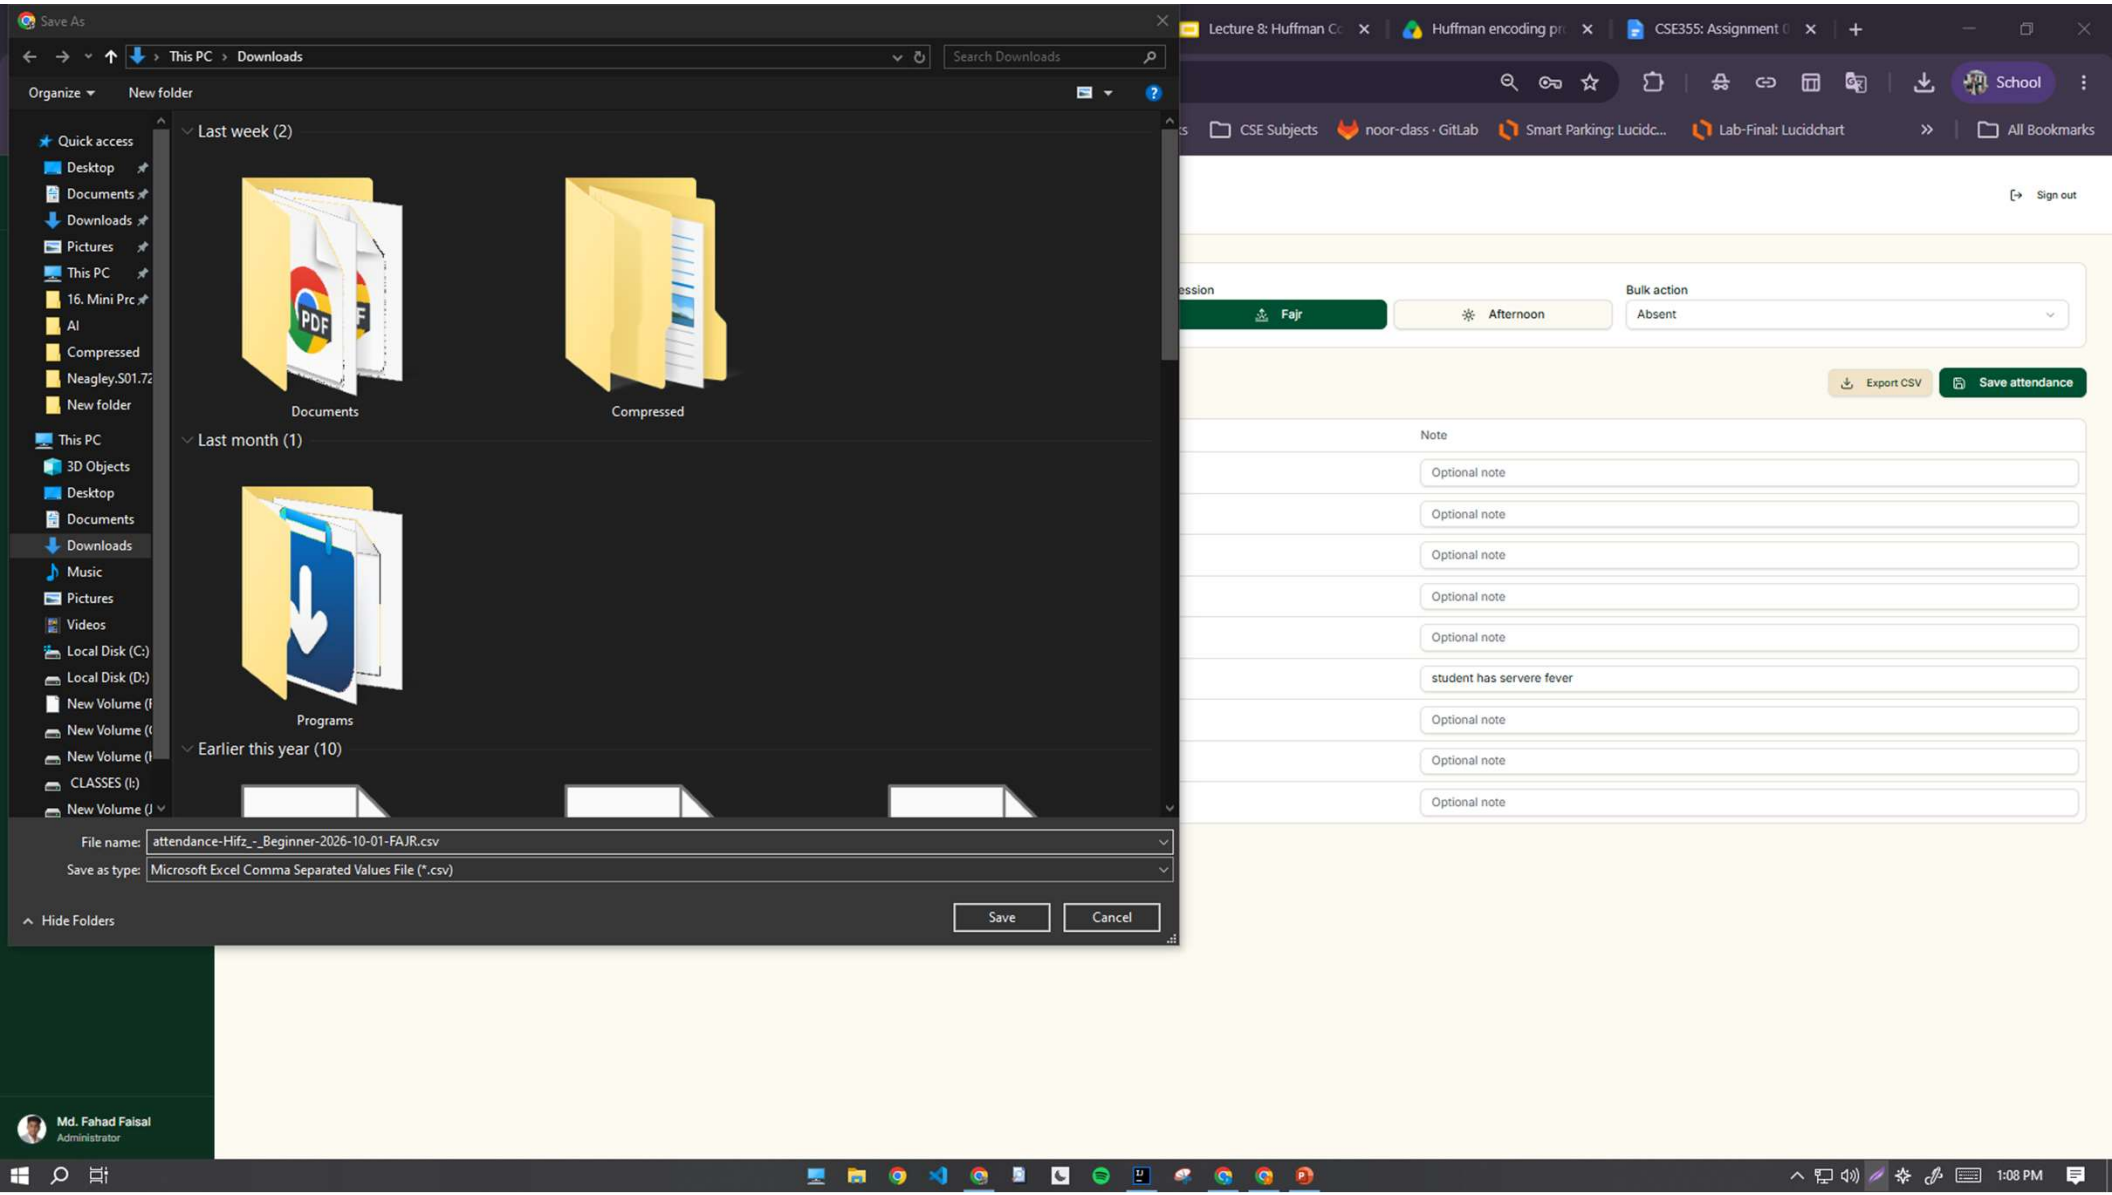

- Instructors only see their assigned sections
- Principal & Admin see everything
- Mark attendance without internet; records queue locally
- Auto-syncs when connection returns

KEY FEATURES

Fees & Financial Ledger

Append-only design — like a bank statement, nothing is ever deleted or edited.

Type	Sign	Meaning
INVOICE	Positive (+)	Charge added
PAYMENT	Negative (−)	Payment received
ADJUSTMENT	+ / −	Correction
REFUND	Negative (−)	Money returned

Balance = Sum of all ledger entries

Monthly Invoice Run

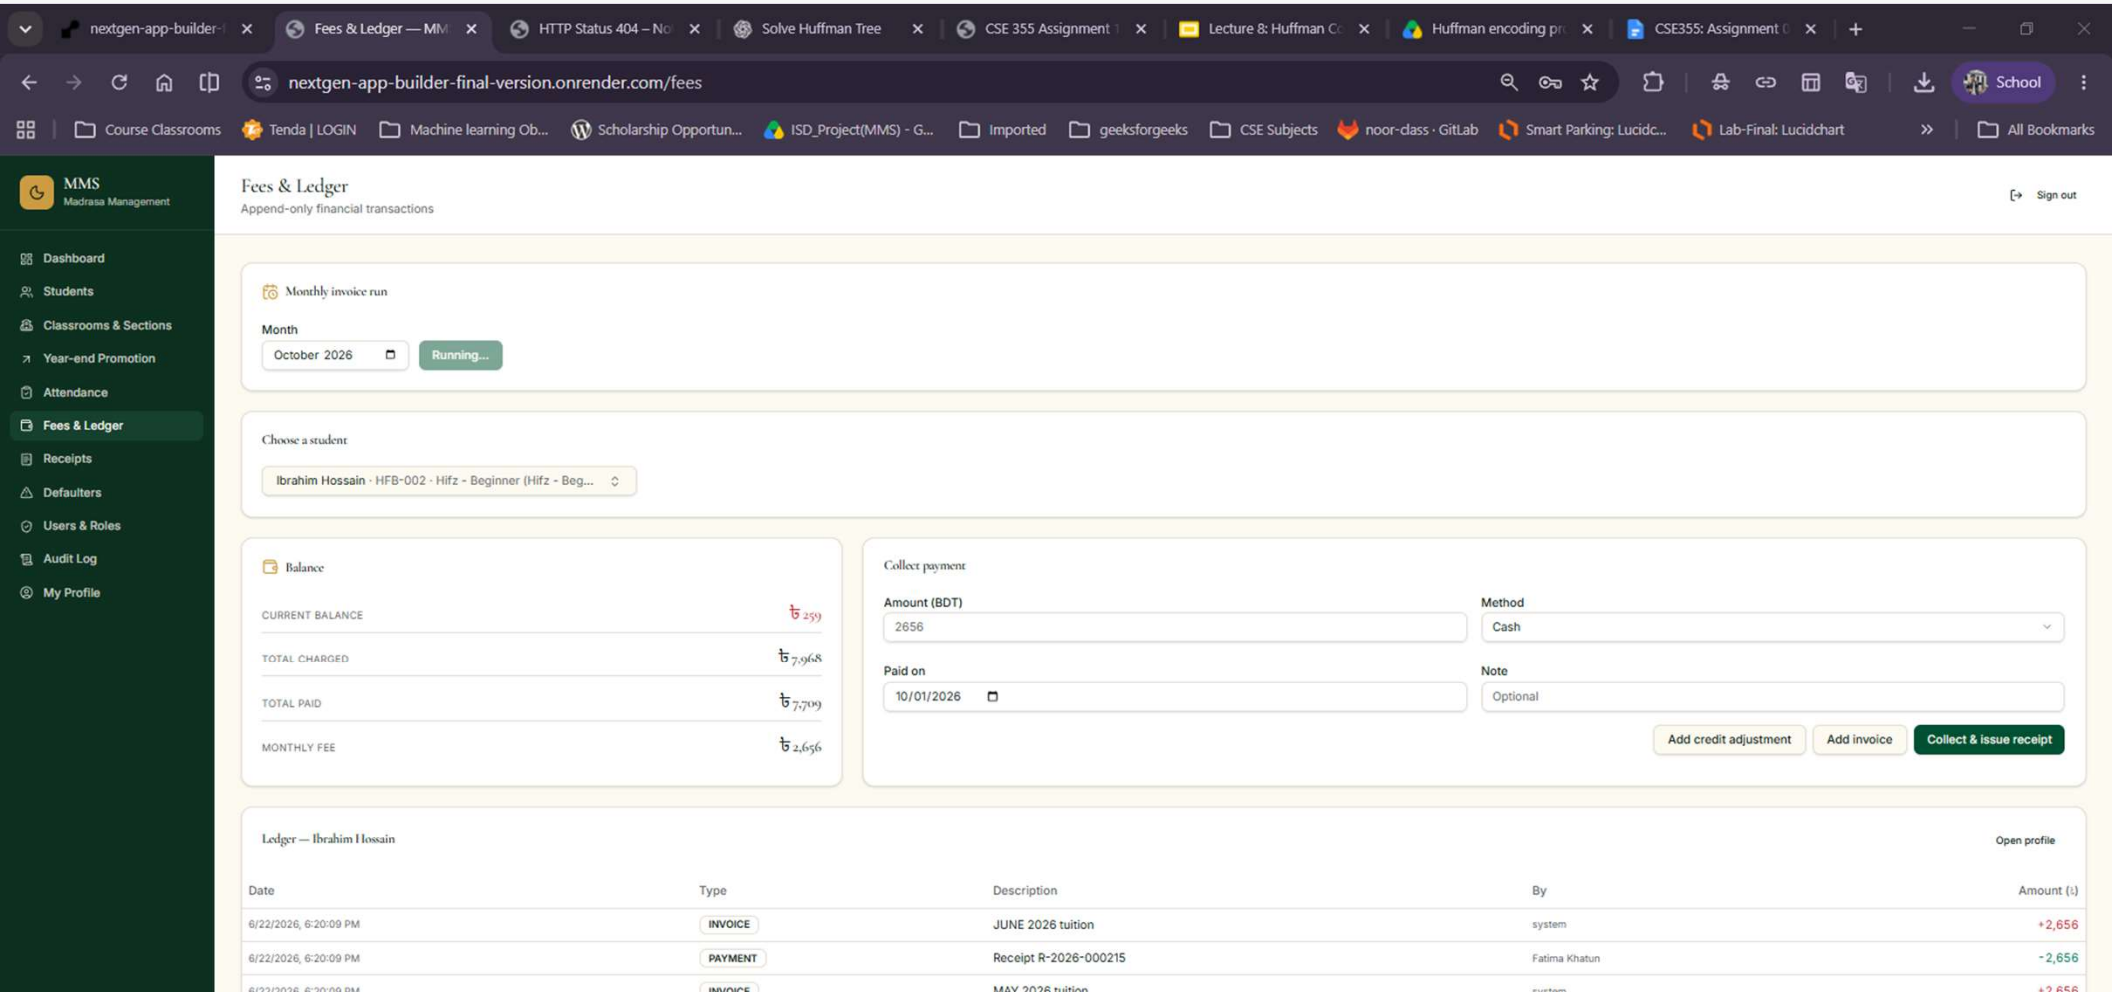

- One click generates invoices for every active student
- **Idempotent** — running twice doesn't duplicate

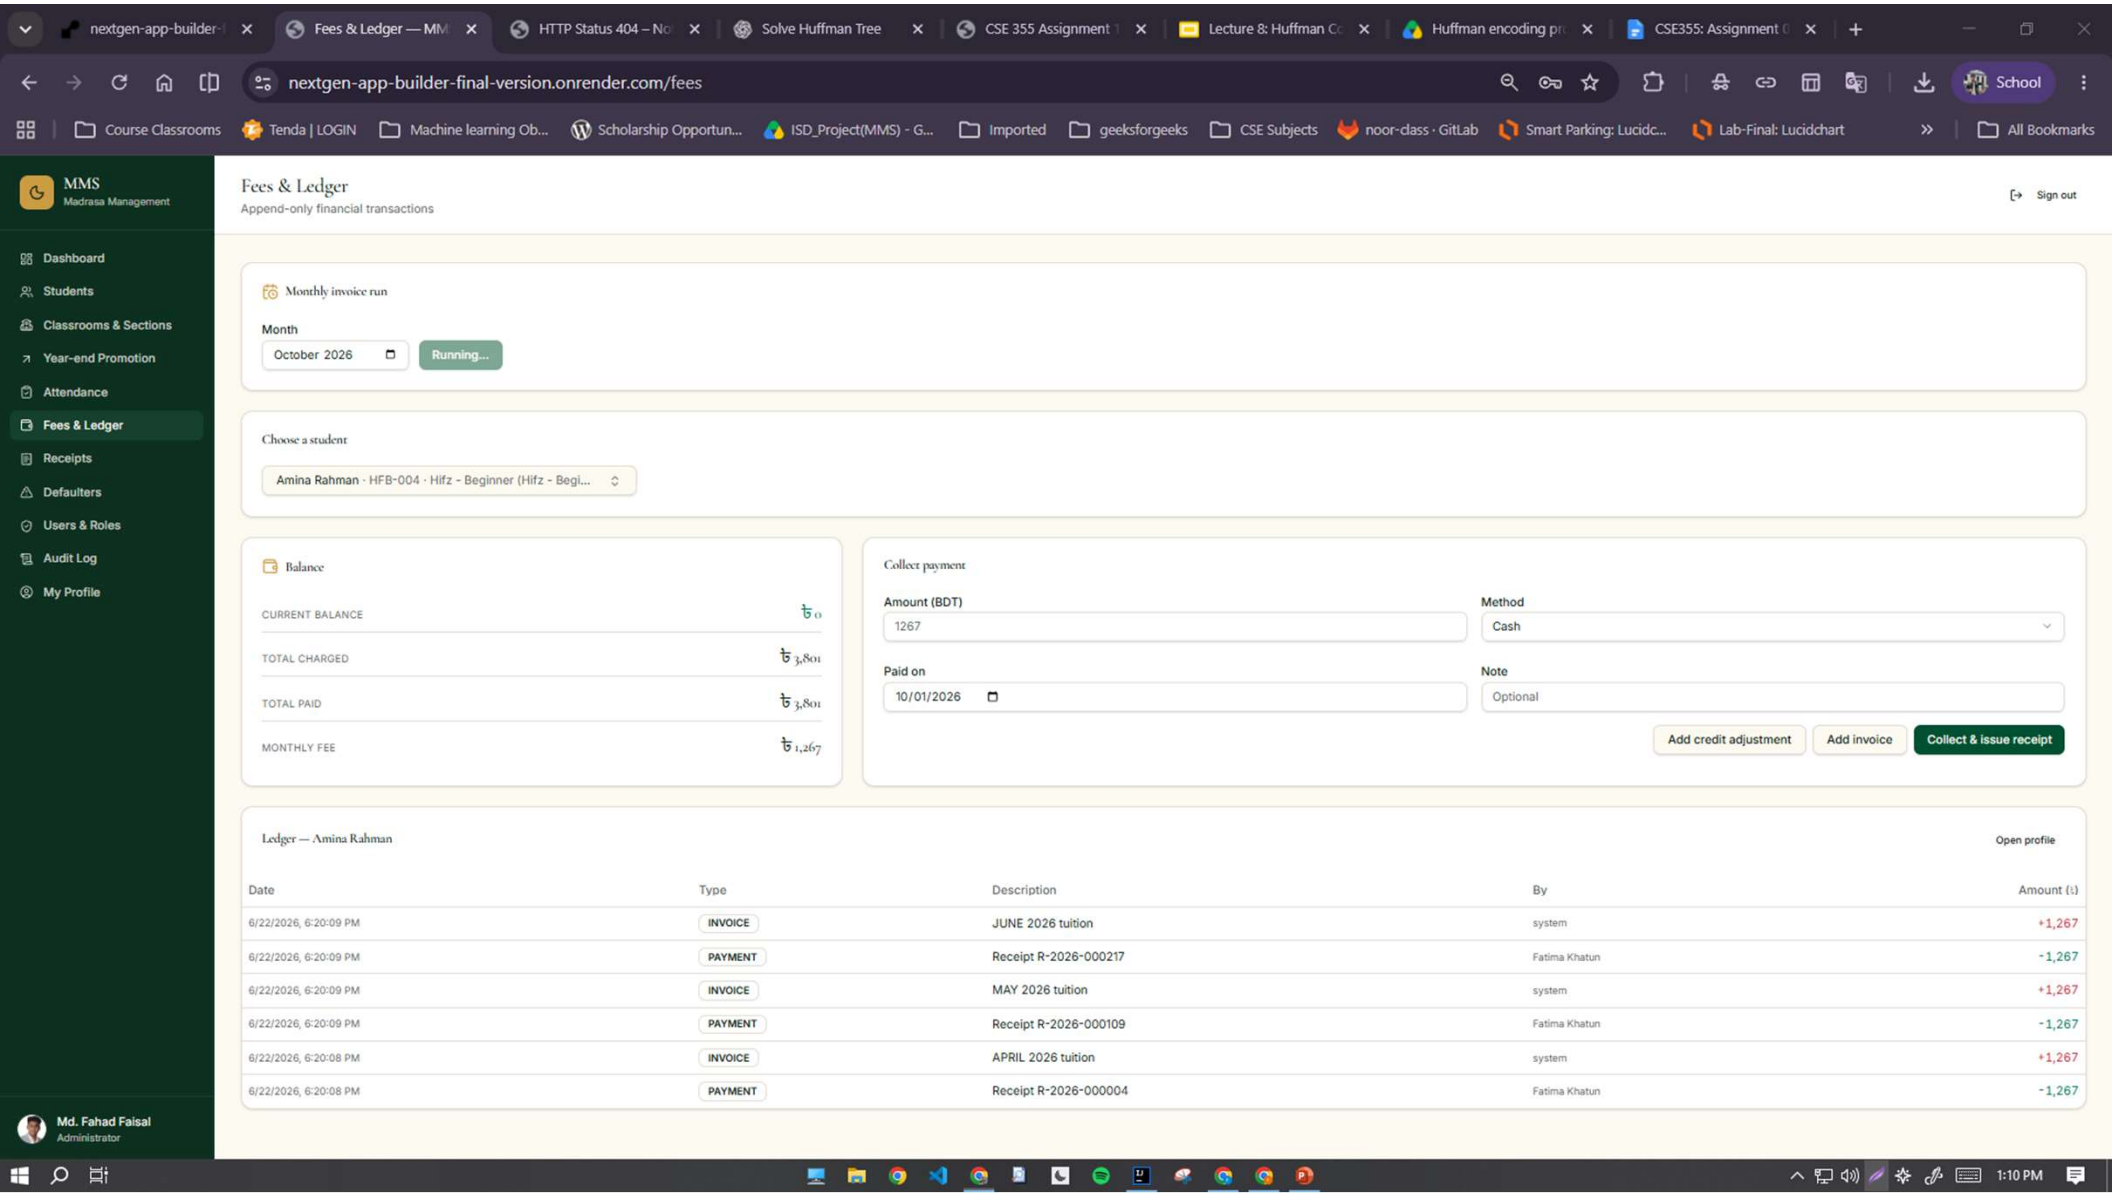

Defaulters List

- Automatic calculation of overdue students
- Shows months overdue and total amount

TECH STACK

Frontend

Frontend Framework

TypeScript

UI & Styling

- **Tailwind CSS 4** — utility-first styling
- **shadcn/ui** — accessible component library
- **Radix UI** — unstyled accessible primitives
- **Lucide React** — icon system
- **Sonner** — toast notifications

State & Forms

- **Zustand** — lightweight client state (auth, UI)
- **React Hook Form** — performant form handling
- **Zod** — schema validation

Deployment Render

TECH STACK

Backend

Framework & Language

- **Spring Boot 3.x** — production-grade Java framework
- **Java 21** — latest LTS with modern features

Security

- **Spring Security** — authn & authz
- **JJWT** — JSON Web Tokens
- **BCrypt** — password hashing
- **Cloudflare Turnstile** — server-side CAPTCHA

Data & Persistence

- **Spring Data JPA** — ORM abstraction
- **Hibernate** — JPA implementation
- **PostgreSQL (Supabase)** — managed relational database

Performance & Utilities

- **Caffeine Cache** — in-memory caching (10-minute TTL)
- **Thymeleaf** — HTML email templates
- **JavaMail (Gmail SMTP)** — email delivery
- **Lombok** — reduce boilerplate code

Deployment

- **Render** — containerized Spring Boot hosting

TECH STACK

Storage & External Services

AWS Storage (S3-Compatible)

- **student-photos bucket** — student profile photos
- **student-docs bucket** — birth certificates, transcripts
- **Server-side only** — service-role key never sent to browser
- Public URLs returned to frontend

Cloudflare Turnstile

- Free CAPTCHA alternative to reCAPTCHA
- Protects login from bots
- Verified server-side via API

Gmail SMTP

- Sends 2FA verification codes
- Sends password reset codes
- Sends monthly fee reminders
